

CREATIVE GENERATION DESIGN

The Creative Generation: Design students invite you to create a hexagon letter fold.

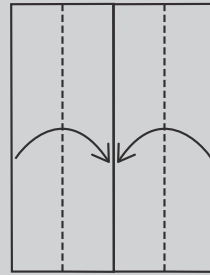

Hexagons are symbols of connection, coherence and stability. Follow the below steps to fold a drawing of a symbolic object into a hexagon.

Once you have finished your fold, you may want to add text about the person or place referred to in your drawing. You can watch a person fold their hexagon letter in this video: qago.ma/hexagon

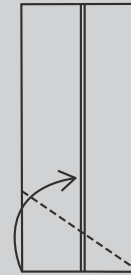

1

Fold an A4 page in half

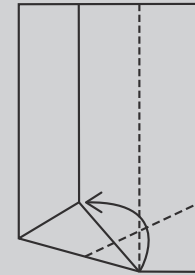

2

Fold both outside edges into the centre

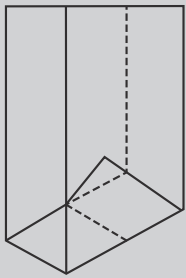

3

Fold a triangle in from the left corner the meet the centre line

4

Open the right side and fold a triangle back over from the left

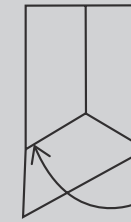

5

Fold the right side back over to meet the centre line

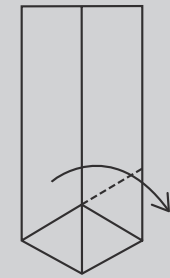

6

Fold half a hexagon upward

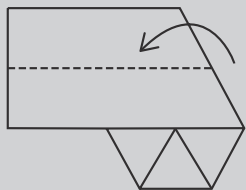

7

Return the half hexagon back to reveal a guideline

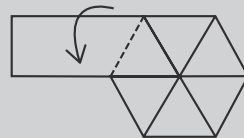

8

Fold the top half of the page down diagonally along the axis

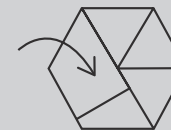

9

Fold the remaining part in half to create the 5th triangle

10

Fold the same strip inwards to form the 6th side

11

Locate and open the first pocket created at step 3

12

Tuck the final strip into the pocket and smooth all folds
